

Sophia Burak

Class 9 Teacher

My name is Sophia Burak and I am excited to be teaching grade 9. In addition to an education degree, I have completed a Bachelor of Science in conservation biology. I have been teaching with the WISE since September 2018, and working as a teacher since September 2016.

I enjoy many aspects of science, but biology is my favourite. I try to present material in a multitude of ways and I value class discussions. I always strive to show that learning can be an end in itself and a little knowledge can unlock deeper layers to everyday things.

Of course I'm not always teaching, and when off duty I enjoy cooking/baking, reading, and taking dance classes. I also enjoy playing badminton, and it has been a real pleasure helping to grow our athletics program. Currently I coach badminton, volleyball and assistant coach soccer. I also run the junior high intramurals program.
